

I am very concerned that a low powered radio station could replace K-LOVE. This station provides a tremendous positive influence in each community it reaches. There is never a concern they will say things that your ears should never hear nor play music that has a negative value to the community. I am asking that you not modify your policy and do not allow LPFM stations to displace current stations using FM translators. I believe it would be a great injustice to lose K-LOVE's programming on these translators. Thank you for considering my opinion.
